PROFESSIONAL SUMMARY

Developer experienced in APIs, indicator automation, Power BI, web scraping and web products. I work with PHP/Laravel, Python, PostgreSQL and JavaScript, from data modelling to deployment, including system integration and CI/CD pipelines.

TECHNICAL SKILLS

- **Languages:** PHP, Python, JavaScript, TypeScript, SQL, Java, C#
- **Backend & APIs:** Laravel, Django, Flask, .NET, REST APIs, asynchronous processes
- **Frontend:** React, jQuery, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Databases:** PostgreSQL, MySQL
- **Data & Automation:** Power BI, n8n, Web Scraping, dashboards
- **DevOps & Infra:** CI/CD, Docker, Linux, production deploys, Cloudflare Tunnel, Git
- **Other:** Synfone, PDF processing, Figma

PROFESSIONAL EXPERIENCE

NBS Telecom — Data Analyst and Developer

Sep/2026 – Present · Ji-Paraná, RO

- Indicator automation with n8n, integrating internal systems and databases.
- Developed a presentation API for consolidating indicators and an API for finding and tracking public procurement opportunities.
- Developed internal solutions with Synfone and web-scraping routines.
- Built dashboards and analysis in Power BI.

Stack: n8n, REST APIs, Power BI, Synfone, Web Scraping.

Eficiência Fiscal — Mid-Level Full Stack Developer

Sep/2023 – Jun/2026 · Ji-Paraná, RO

Promoted to Mid-Level in Feb/2026. Previously: Web Developer (Sep/2023 – Jan/2026).

- Developed Eficiencia.app in Laravel, from database modelling to production deployment.
- Development of RESTful APIs and asynchronous processes for internal product workflows.
- Refactor of the messaging system, reducing fragility in the flow and making maintenance easier.
- Optimised queries, subqueries and indexes on large-volume PostgreSQL tables.
- Code review, debugging, frontend evolution and production deployment management.
- Technical support for new developers learning the product, deployment flow and code patterns.

Stack: PHP/Laravel, PostgreSQL, JavaScript/jQuery, Python, REST APIs, Java.

Arquitetura do Saber — Front-End Developer

2023 · Ji-Paraná, RO

- Developed web interfaces on a short-term project.

ACADEMIC RESEARCH AND EXTENSION PROJECT

Solos Digital — Backend Developer

Jun/2026 – Present

- Developed the API for the research and extension project.
- Set up and monitored deployments, including CI/CD implementation and maintenance.

FEATURED PROJECTS

SIMC — Academic Research Project

2024

Led team organisation and task breakdown, implemented authentication, modelled the database and integrated services. Deployed via Cloudflare Tunnel, exposing a local Arduino-hosted server to production.

Stack: Python, Arduino, Cloudflare Tunnel, authentication, data modelling.

BarbeariaPro API

Personal project

REST API for full barbershop management: bookings, service catalog, customers and financial control.

Stack: C#, .NET, REST API, SQL.

github.com/Fimaciel/BarbeariaPro-API

Other GitHub projects

tTempbr (Java desktop temperature monitor), Aqualimpo (Laravel POS), SMA (Python + Arduino IoT), DocuMentor (JavaScript web app).
